

# Case Study: Store Waste

**Enviroco is one of the leading hazardous waste-management companies in the UK. Supported by HIPPOWASTE™, it manages waste collections from B&Q's entire estate of over 300 stores.**

Enviroco specialises in the management of hazardous waste materials - a perfect fit for B&Q retail stores which need to safely dispose of a wide range of hazardous materials, from batteries and paint, to aerosols and fluorescent tubes.

To deliver a full, national service for B&Q - covering every waste stream, at every store - Enviroco brought HIPPOWASTE into the contract in 2009. Together, we have formed a strong service-led partnership, fulfilling daily segregated-waste collections on the B&Q account in perfect sync. Our combined focus is on ensuring best value for the customer, reducing waste to landfill, and delivering a fast, reliable, ethical service.

While Enviroco provides specialist containers for B&Q's hazardous streams, HIPPOBAG™s are used at the back of store for heavy waste streams, including ceramics, hardcore, green waste and plasterboard. The 1 tonne, 1 cubic yard MIDIBAG is ideal, allowing segregation in the warehouse yard. Bags are stored flat-packed on site, ready as an immediate waste container when required. 100% of the heavy waste collected is recycled.

The partnership sees two ISO-accredited waste-management companies come together to achieve the same goals. Both are committed to delivering service excellence while also supporting their customer's firm commitment to reduce waste and promote diversion from landfill.

WHAT  
THEY  
SAY  
ABOUT  
US

Working in partnership with HIPPOWASTE has been easy. We're a great team, they collect the waste that we don't and are every bit as committed to diversion from landfill.

John Coull, Commercial Director, Enviroco.
